Contents

Volume 44 • Number 1 **September 1990**

ARTICLES

Structural and Functional Analysis of the Rat Testis-Specific Histone H1t Gene, **Sidney R. Grimes, Steven A. Wolfe, Jeffrey V. Anderson, Gary S. Stein, and Janet L. Stein** 1

Protein Synthesis in Embryonic Tissues During Mouse Postimplantation Development, **Karl-Friedrich Murach, Monika Frei, Dieter Gerhäuser, and Karl Illmensee** 19

Interrelationships of Platelet-Derived Growth Factor Isoform-Induced Changes in c-*fos* Expression, Intracellular Free Calcium, and Mitogenesis, **Pamela A. Diliberto, Susan H. Bernacki, and Brian Herman** 39

mRNA Transcription Determines the Lag Period for the Induction of Pineal Melatonin Synthesis in the Syrian Hamster Pineal Gland, **Aldo Gonzalez-Brito, Maureen E. Troiani, Armando Menendez-Pelaez, Maria J. Delgado, and Russel J. Reiter** 55

Control of Expression and Maturation of Epidermal Growth Factor Receptor, **Manjusri Das, Prabakaran Kesavan, and Jayant Khire** 61

Volume 44 • Number 2 **October 1990**

ARTICLES

Monoclonal Antibody 425 Inhibits Growth Stimulation of Carcinoma Cells by Exogenous EGF and Tumor-Derived EGF/TGF-α, **Ulrich Rodeck, Noel Williams, U. Murthy, and Meenhard Herlyn** 69

Gene Expression During Endochondral Bone Development: Evidence for Coordinate Expression of Transforming Growth Factor β_1 and Collagen Type I, **Rita Bortell, Leesa M. Barone, Melissa S. Tassinari, Jane B. Lian, and Gary S. Stein** 81

Alteration of Lacto-Series Glycolipid Glycosyltransferase Activities in Human Colonic Adenocarcinoma DLD-1 Cells After Culture in *N,N*-Dimethylformamide-Containing Medium, **Eric H. Holmes and Thomas G. Greene** 93

PROSPECTS

Iron Regulation of Ferritin Gene Expression, **Hamish N. Munro** 107

Kinetic and Molecular Species Analyses of Mitogen-Induced Increases in Diglycerides: Evidence for Stimulated Hydrolysis of Phosphoinositides and Phosphatidylcholine, **Daniel M. Raben, Melissa S. Pessin, Leela A. Rangan, and Timothy M. Wright** 117

Volume 44 • Number 3 **November 1990**

PROSPECTS

Analysis of DNA-Protein Complexes Induced by Chemical Carcinogens, **Max Costa** 127

ARTICLES

Differentiation of BC_3H1 and Primary Skeletal Muscle Cells and the Activity of Their Endogenous Insulin-Degrading Enzyme Are Inhibited by the Same Metalloendoprotease Inhibitors, **Celik Kayalar, William T. Wong, and Lisa Hendrickson** 137

Biochemical Changes Associated With the Mechanism Controlling Superoxide Radical Formation in the Aging Rotifer, **Masaaki Sawada and John C. Carlson** 153

Expression of a 64 kD Adipocyte-Specific Plasma Membrane Protein in Genetically Lean but not Obese Porcine Adipocytes, **John Killefer and C.Y. Hu** 167

Multiple Types of mRNA-Cytoskeleton Interactions, **G. Zambetti, E.G. Fey, S. Penman, J. Stein, and G. Stein** 177

Oncogene Amplification Correlates With Dense Lymphocyte Infiltration in Human Breast Cancers: A Role for Hematopoietic Growth Factor Release by Tumor Cells?, **Ruoping Tang, Barry Kacinski, Pierre Validire, Frédéric Beuvon, Xavier Sastre, Patrick Benoit, Anne dela Rochefordière, Véronique Mosseri, Pierre Pouillart, and Susy Scholl** 189

Volume 44 • Number 4 **December 1990**

PROSPECTS

Management of Polyamine Pools and the Regulation of Ornithine Decarboxylase, **Rowland H. Davis** 199

ARTICLES

Characterization of the Role of Melanoma Growth Stimulatory Activity (MGSA) in the Growth of Normal Melanocytes, Nevocytes, and Malignant Melanocytes, **R. Bordoni, R. Fine, D. Murray, and A. Richmond** 207

Stimulation of a Histone H4 Protein Kinase in Triton X-100 Lysates of Rabbit Peritoneal Neutrophils Pretreated With Chemotactic Factors: Lack of Requirements of Calcium Mobilization and Protein Kinase C Activation, **Chi-Kuang Huang, Gary R. Laramee, Munehiro Yamazaki, and Ramadan I. Sha'afi** 221

Characterization and Partial Purification of Human Epithelial Transforming Growth Factor, **Damien J. Dunnington, Robert G. Scott, Mario A. Anzano, and Russell Greig** 229

Detection and Localization of Actin mRNA Isoforms in Chicken Muscle Cells by In Situ Hybridization Using Biotinated Oligonucleotide Probes, **Krishan L. Taneja and Robert H. Singer** 241

Interleukin-1β- and Tumor Necrosis Factor α-Independent Monocyte Stimulation of Fibroblast Collagenase Activity, **David A. Tipton, Michael J. Pabst, and Mustafa Kh. Dabbous** 253

Characterization of Anti-Sticking Factor-II From Goat Epididymal Plasma, **Nabina Roy and Gopal C. Majumder** 265

Author Index to Volume 44 275

Subject Index to Volume 44 277
